

Songbird

**Build songs.
Learn what makes them work.**

A practical songwriting platform.
Learn the basic theory behind popular music.

HARMONIZER-FIRST KICKOFF

One idea. More possibilities.

Turn an idea into a song.

A platform for everyday songwriters - not just a harmony generator.

Create music you can play or sing.
Learn the basic theory behind the songs you write.

Build the song

Find chords for your melody.
Shape verses and choruses.
Add parts you can play or sing.

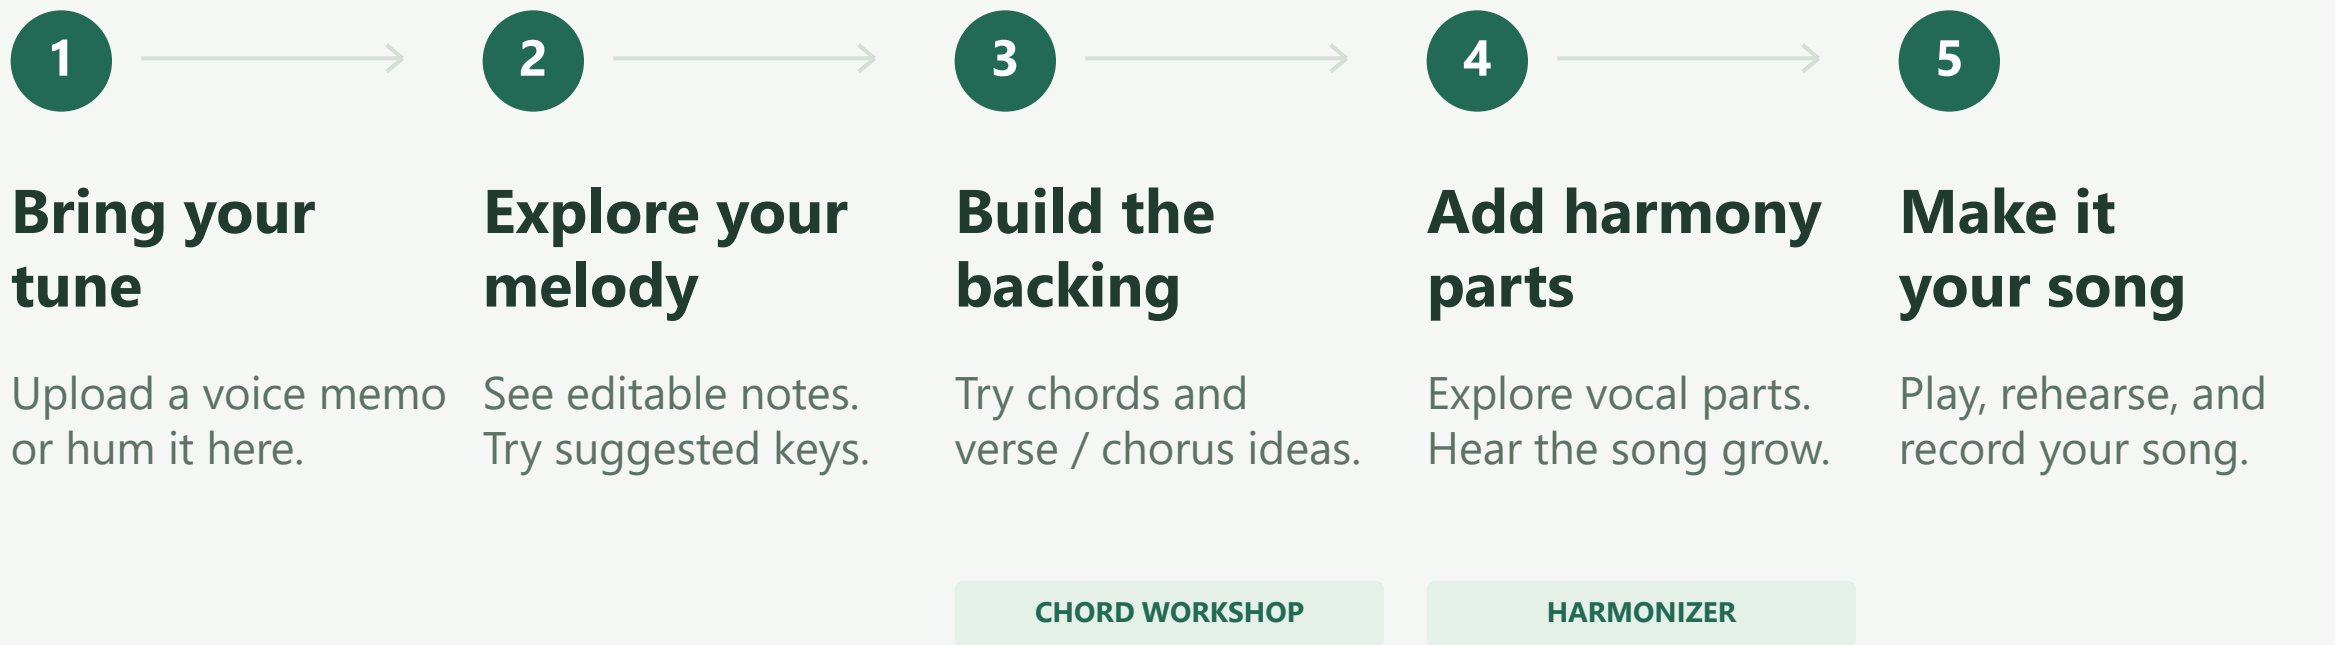

Learn while writing

Hear different musical choices.
See why notes and chords fit.
Keep the sound that feels like you.

Practical theory for popular songwriting - without needing to study it first.

From a hummed tune to a song.

A tune from the commute. A voice memo. A starting point for a whole song.

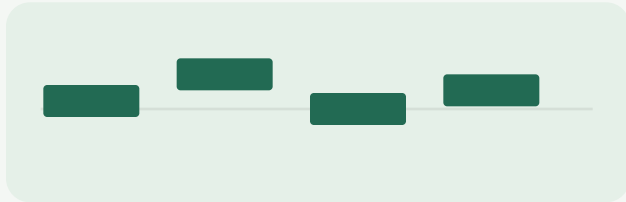

Key, tempo, and chords are choices along the way - not entry requirements.

Harmonizer: add voices around your melody.

One lead melody in. Up to four added harmony lines to hear, edit, and sing.

PRIMARY BUILD TARGET

Your melody

Uses the chords and key chosen for your song.

Add 1-4 harmony lines

Part 1

Part 2

Part 3

Part 4

Hear the result

Piano playback with backing chords. Solo any part.

Make it yours

Choose range, mode, and style. Move notes to fit your song.

Rehearse a line. Export MIDI or a piano guide for your own recording.

Harmonizer: hear and shape each part.

Conceptual layout for discussion. The notes below are illustrative, not generated output.

Chord Workshop: build around your melody.

Choose chords and song sections, explore voicings, and learn why the choices work.

THE TOOL VISION

Find chords to try.

Melody lands on E?
Try C or Am beneath it.

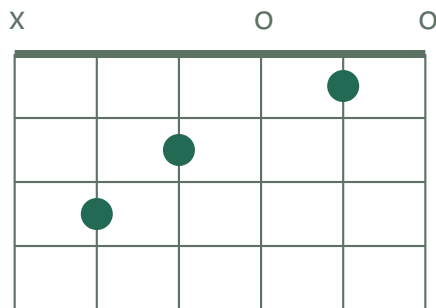

Both chords contain E.

Shape the song.

Try different progressions
for verse and chorus.

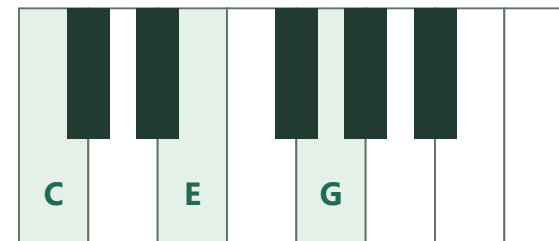

VERSE C Am F G CHORUS F G C C

Guitar / C

Open shape / x32010

Piano / C

C-E-G or E-G-C: same chord, different voicing.

Choose a chord, hear it with your melody, and see how to play it.

Chord Workshop: the demo minimum.

Set a progression, hear it, and use it in the Harmonizer.

BASIC TOOL / DEMO TARGET

Your progression

Example: 96 BPM / 4/4

BAR 1

C

1 bar

BAR 2

Am

1 bar

BAR 3

F

1 bar

BAR 4

G

1 bar

Start from your chords or a preset.

+ Chord

Harmonizer

Uses the chord names and their timing under the melody.

Same song. No re-entry.

Edit chords + timing

Add, change, reorder, remove.
Set a length for each chord.

Audition with piano

Hear chords with the melody.
Loop the phrase while choosing.

Use it for harmonies

Share the progression directly.
Keep control of regeneration.
